SUMMARY

A Detail-oriented and innovative Software Developer with a strong foundation in programming, problem-solving, and software engineering principles. Proficient in designing, developing, and maintaining efficient, reliable, and scalable software solutions. Adept at collaborating in dynamic teams and contributing to the development lifecycle using modern technologies and methodologies. Eager to leverage technical skills and a passion for innovation to deliver impactful results in the tech industry.

EDUCATION

JP College of Engineering | Anna University

Bachelor of Computer Science Engineering 7.5
2020 – 2024

Government Higher Secondary School

Computer science 64%
2019 – 2020

Government Higher Secondary School

SSLC 78%
2019 – 2020

SKILLS

- C program
- Java program
- Python Program
- Scala program
- HTML, CSS, Javascript
- JQuery
- UI/UX
- Graphic Design
- Web Design
- word press

CERTIFICATIONS

- Full Stack With Python Programming | GUVI

PROFESSIONAL EXPERIENCE

Alens Soft Technology | Internship

Scala Developer | Oct 2024-Dec 2024

- Gained hands-on experience in back-end development using Scala.
- Learned and applied functional programming concepts to real-world projects.
- Participated in debugging and optimizing application performance.

PROJECT EXPERIENCE

IoT-Based Irrigation System for Water Conservation

IOT Project | 02/2024 -04/2024

- Spearheaded the development of a phone-operated IoT-based irrigation system to enhance water conservation and agricultural efficiency.
- Implemented sensors, microcontrollers, and cloud computing for remote monitoring and irrigation control via a mobile app.
- Achieved substantial improvements in water efficiency and streamlined resource management processes.

Web Store Project

Website Development | 01/2023 - 03/2023

- Developed an interactive web store serving as a hub for online games, educational resources, and news updates.
- Utilized HTML, CSS, and JavaScript for front-end development, ensuring a responsive and user-friendly interface.
- Designed and managed a robust database system using SQL for efficient data storage and retrieval.

CERTIFICATION

FULL STACK WITH PYTHON PROGRAMMING
